(54) Title: BIOGEOMETRY SHAPES & METHODOLOGY FOR BIOLOGICAL ENERGY BALANCING

(57) Abstract: Geometric shapes and techniques, along with the methodology behind them, invented to produce a qualitative energy balancing effect on biological systems, be it human beings or otherwise. This results in a positive effect on biological functions, either preventative or healing, and protection from environmental energy disturbances. The methodology introduced by the inventor is the discovery of the qualitative energy components of earth energy power-spots {specifically those components are qualitative higher harmonics of the frequencies of gold and ultra-violet, and a carrier wave in the negative green of the energy spectrum} and development of geometric shapes and techniques to reproduce and amplify that energy balancing quality. This methodology has been termed/copyrighted "BioGeometry" by the inventor. The geometric shapes and techniques work either directly through proximity to the biological system or from within its surrounding environment, or by superimposing on a radiating energy source that reaches the biological system. The two techniques are: (1) Using two of the shape (Fig. 4) as geometric polarizers and orienting them in relation to a central axis to produce the energy balancing quality as in (Fig 7) and termed "BioGeometry Dial", (2) Using shape (Fig. 4) as an individual geometric polarizer and aligning samples of materials from the biological system itself or its environment to produce the energy balancing effect (Fig. 8) and termed "Energy Balancing Wheel" when in two-dimensional form and "Energy Balancing Sphere" when in three-dimensional form.
